

**Press Release 2015, March 31**

**Partnership Signum Bildtechnik GmbH and LMC LiveMotionConcept GmbH**

Signum Bildtechnik in Munich and LMC LiveMotionConcept in Walluf today confirm the strategic cooperation for the development and the exclusive distribution of the High Speed-Slow Motion server **VisionRec**. Based on the server technology signum.VisionFactory a broadcast high-speed recording server is developed, which can be inserted seamlessly into existing broadcast environments by the integration of proven Antelope control technology.

Both companies combine their expertise in the areas of live TV and high speed imaging to provide a cost effective alternative to existing server solutions, serving the technical and budgetary requirements of the market.

Signum Bildtechnik is developing video server, video server and slow motion recorder systems for broadcasters. Signum's customers include ZDF, WDR, NDR, BR, SWR, etc.

LMC is developing high-speed camera systems for live broadcast market. Its customers include television stations on all continents, global television production companies, as well as numerous international sports series such as Formula 1, etc.
