Signum Bildtechnik GmbH launches signum.VisionFactory at the Broadcast India 2015 in Mumbai

Signum Bildtechnik today announced the official launch of its high-speed recording and super slow motion playback server signum.VisionFactory to the Indian market. Together with the Antelope-VisionRec Camera Control and Payout Control and the high speed camera Pico a solution is available which allows a new experience seeing sport events with breath taking slow motion scenes.

With the server capable to continuously record at up to 350 frames per second per camera from multiple full HD or 2k cameras this solution is setting a new milestone in the landscape of immediate slow motion playback while recording.

With over 25 years of experience in high speed recordings Signum is setting once more a landmark in this exciting market space.

Signum Bildtechnik is developing video server, graphic server and slow motion recorder systems for broadcasters. Signum's customers include large broadcasters like ZDF, WDR, NDR, BR, SWR, etc. and suppliers of broadcast services in sport events like SMT, ESC, Nuart, Ubiqueline.
